

Rahul Waghmare

Senior Software Engineee

Hyderabad, India | 8669659526 | rahulwaghmare1090@gmail.com | [linkedin.com/in/rahul-waghmare-211a27381](https://www.linkedin.com/in/rahul-waghmare-211a27381)

Summary

Senior Software Engineer with 9+ years of experience designing and building scalable, high-performance Frontend platforms and data-intensive web applications. Deep expertise in modern JavaScript ecosystems including **Angular**, **React**, **TypeScript**, **Redux**, **Node.js**, and Oracle JET. Specialized in component-driven architecture, scalable UI systems, and state management for large-scale applications, with strong focus on performance optimization, frontend architecture, and building secure, accessible frontend interfaces aligned with WCAG/ARIA standards.

Hands-on experience with **Angular 18+ features**, including standalone components, signals-based reactivity, improved control flow, deferred loading, and optimized change detection strategies for high-performance UI applications.

Proven technical leader experienced in system design, architecture ownership, and delivering enterprise SaaS platforms and mentoring engineers. Successfully delivered production systems across Banking, Media/Broadcasting, Healthcare.

Technical Skill

Frontend: Angular(8, 16+), React, TypeScript, JavaScript(ES6+), HTML5, CSS3, Tailwind, Bootstrap,

UI Libraries: Angular Material, PrimeNg, OJET, Knockout.js,

State Management: RxJs, NgRx, Redux

Backend: Node.js, Express.js, RESTful APIs, SSO, OAuth, JWT,

Database: MySQL, PostgreSQL, MongoDB, Oracle

Testing: Jasmine, Karma, Jest, TDD

Tools: Git/GitHub, Azure DevOps (CI/CD), Jira, VS Code, Agile, Docker

Design Systems: Performance Optimization, Component Architecture, REST APIs Integration, Accessibility WCAG, Responsive Design, Cross Browser Compatibility, Modular Frontend Architecture

Work experience

Oracle India Pvt. Ltd

Dec 2023 - April 2026

Senior Application Engineer

Oracle Enterprise Command Center (ECC)

Tech Stack: React, JavaScript, UI Architecture, Accessibility (WCAG/ARIA), React Query, Performance Optimization, OJET, Node.js, Express.js, MySQL

- Led the frontend performance initiatives for Oracle Enterprise Command Center (ECC), implementing parallel component loading and asynchronous data fetching to reduce dashboard load times by 77%.
- Architected frontend systems for Oracle Enterprise Command Center (ECC), building scalable analytics dashboards for enterprise users..
- Optimized large-scale data rendering to handle 30,000+ records seamlessly by utilizing windowing/virtualization, sophisticated DOM optimization, and granular component-level tuning.
- Overhauled configuration architecture to reduce storage footprint by **80%**, significantly enhancing application scalability and response times for global enterprise deployments.
- Developed a custom Node.js SDK that streamlined product integrations and improved implementation speed for connected services.
- Built reusable UI component libraries that accelerated development consistency and reduced duplication across modules.
- Implemented an AI-assisted interface for surfacing insights and improving end-user productivity.
- Ensured WCAG-compliant accessibility standards, contributing to a 60% reduction in UI-related defects.

Accenture Solutions Pvt. Ltd

Nov 2021 - Dec 2023

Senior Software Engineer

Integrated Workplace Management System (IWMS)

Tech Stack: Angular 15, TypeScript, PrimeNG, RESTful APIs, Microservices integration, Git, DevOps CI/CD pipelines, Agile/Scrum, Responsive Web Design, Cross-browser compatibility, Unit Testing (Jasmine/Karma),

- Led frontend architecture for an Angular 15-based IWMS (Integrated Work Management System) platform, focusing on modular design and long-term scalability.
- Engineered and developed 25+ robust, reusable Angular components designed for cross-team consumption, utilizing advanced design patterns to ensure system scalability and reduce UI defects by 30%.
- Reduced duplicate code by 50% by creating reusable shared components and standardizing UI patterns.
- Managed sprint planning, backlog refinement, task allocation, and client communication within Agile delivery cycles.
- Implemented lazy loading and route-level code splitting to improve load performance and application responsiveness.
- Delivered multiple production releases successfully while maintaining accessibility and cross-browser compatibility standards.
- Mentored frontend developers and drove best practices for code quality, architecture, and maintainability.

Wipro Ltd.

Nov 2020 - Nov 2021

Senior Software Engineer

NSE Parivartan Trading Platform

Tech Stack: Angular 14, TypeScript, Material UI, RESTful APIs, Microservices integration, Git, DevOps CI/CD pipelines, Agile/Scrum, Responsive Web Design, Cross-browser compatibility, Unit Testing (Jasmine/Karma), Node.js, express, MySQL, PostgreSQL

- Developed high-performance Angular UI for real-time trading workflows and improved responsiveness for data-heavy screens
- Implemented reusable components, unit testing, and maintainable architecture for scalable frontend delivery.
- Maintained 80%+ unit test coverage using Jest and Enzyme while performing root cause analysis and code reviews to ensure highly maintainable code.
- Maintained 80%+ unit test coverage using Jasmine, karma, while performing root cause analysis and code reviews to ensure highly maintainable code.

SP Software Pvt. Ltd. Software Engineer <i>FTA Data View</i> Tech Stack: Angular 12, TypeScript, PrimeNG, RESTful APIs, Microservices integration, Git, DevOps CI/CD pipelines, Agile/Scrum, Responsive Web Design, Cross-browser compatibility, Unit Testing (Jasmine/Karma) - Developed BI dashboards using Angular 8 & Angular Material - Handled large-scale data visualization and API integration - Improved usability and performance - Implemented RxJS-based reactive data flows and resolved complex production issues and ensure high application stability and uptime. - Improve Usability and Performance	Nov 2018 - Sep 2020
--	----------------------------

Locuz Enterprise Solutions Ltd. Software Engineer <i>Cloutor</i> Tech Stack: Angular 8, TypeScript, Angular Material, RESTful APIs, Microservices integration, Git, DevOps CI/CD pipelines, Agile/Scrum, Responsive Web Design, Cross-browser compatibility, Unit Testing (Jasmine/Karma) - Developed cloud-based web application UI design - Participated in full SDLC including requirement gathering and deployment - Maintained 80%+ unit test coverage using Jasmin, karma, while performing root cause analysis and code reviews to ensure highly maintainable code.	Aug 2016 - Oct 2018
--	----------------------------

Education

University of Pune Master Of Computer Application (MCA)	2009 - 2012
SWAMI RAMANAND TEERTH MARATHWADA UNIVERSITY, NANDED Bachelor Of Computer Application (BCA)	2006 - 2009
